

River of Fire: The Design

It is proposed for the design to emerge outside the main entrance of the building, engaging with the public and drawing them into the Library.

The Palm 'Shaded' areas will allow for quieter areas on both shores: The Café and The Friends of the Library areas.

The 'bridge' anchors the design and represents connecting both shore communities.

The glowing 'heart' of the design, the epicentre of The River of Fire. A literary quote will be placed at its core, reinforcing thousands of years of fire myths and their origins based upon the accumulation of knowledge. Representating a modern Library/knowledge hub at the heart of the community.
